

HEPA PRO MAX VACUUMS

13 & 20 GALLON CONCRETE VACUUMS:

Now you can vacuum concrete dust and debris with a super high 431 CFM using a standard 120V outlet. Introducing HEPA Pro Max portable tank vacuums, a gamechanger for professional contractors seeking a 120V Vacuum that exceeds OSHA requirements and airflow recommendations from major tool manufacturers. An extra-large, disposable synthetic filter bag contains the dust and allows operators to work long periods without interruption due to clogging and restricted air flow. It also makes handling and disposing of dangerous silica dust safer and more hygienic for workers. The HEPA Pro Max line of vacuums are equipped with genuine

KEY FEATURES:

- Three commercial grade 2-stage air thru 120V motors for quick and complete recovery of fine dust and other hazardous materials.
- Two tank options. Choose a compact, maneuverable 13-Gallon or a 20-Gallon with built-in dolly with large 10-inch rear wheels.
- Individually tested and certified HEPA filter, minimum efficiency of 99.97% at .3 microns.
- Dacron Filter Bag protects HEPA filter and automatically cleans itself without manual intervention such as vibration or pulse.
- 50-foot power cord for working large areas without stopping to locate an outlet.
